Free Estimate and Demo - Ask For John

**REMOVES - Vehicle Oil Spills and Stains embedded in concrete:
Grease, fuel, hydraulic fluids, transmission oil, petroleum, diesel.**

- Reduce water usage – Conserve water/environmentally friendly/non-toxic/non-corrosive.
- Minimize waste water runoff and comply with city & state storm water prevention programs & laws.
- Improve the image of your business. Reduce oil build-up long term. Comply with City Hazard Waste Ordinances & Fines
- Incorrect high pressure washing can damage concrete.
- Remain open to traffic right after installation & application.

How does This Work?

A natural bio-enzyme in powder form decomposes and dissolves oil hydrocarbons on stained cement/concrete. It starts to work immediately and penetrates cement sub-surface and pores. Significant improvement will be noticed after 24 hours. Will not harm paint strips or concrete.
